PROFESSIONAL SUMMARY

QA + Data Analytics professional combining software quality, data validation and analytical capabilities. 3+ years of professional QA experience testing applications, APIs and databases, with practical data analytics skills in SQL, Excel and Python/Pandas.

SKILLS

QA: Manual Testing, Functional Testing, Regression Testing, API Testing, Postman, SQL, Database Testing, Data Validation, Test Case Design, Defect Reporting, Jira

Data Analytics: SQL, Excel, Python, Pandas, Data Cleaning, EDA, Data Visualization, KPI Analysis, Trend Analysis, Reporting

QA + Data: Data Quality, Data Validation, API/Data Validation, Database Verification, QA Metrics, Test Result Analytics, Data Reconciliation, Anomaly Investigation

Tools: Jira, Zephyr, Confluence, Postman, Git, Selenium, Cucumber, Jenkins (about 3 months hands-on automation)

AI: ChatGPT, Claude, GitHub Copilot for test design, scripting and documentation

EXPERIENCE

Quality Analyst, BlueDwarf Pvt. Ltd., Ahmedabad

Jul 2023 – Present

- Test UK and Australia–New Zealand business software across functional, regression, API and SQL backend testing in an Agile SDLC/STLC environment.
- Authored 10,000+ test cases and reported 5,000+ defects in Jira; ran test cycles and execution reports in Zephyr.
- Verified calculation-heavy workflows, reports and integrations, including SSO login and data fetched from third-party applications.
- Validated data with SQL (joins, subqueries, stored procedures, views) and tested APIs in Postman: status codes, JSON responses and auth tokens.
- Reduced full regression from 8–9 days to 5–6 days (about 35%), with about 2% client-found defects per release and none critical.
- Smoke/sanity, cross-browser and UAT testing; release sign-off and go-live testing.
- Wrote Selenium scripts and Cucumber feature files, extended an existing page-object framework, ran suites in Jenkins and used Git branches and pull requests.
- Built an AI-assisted workflow: ChatGPT drafts test cases from user stories, I review them, execute manually and track in Zephyr.
- Work daily with clients, developers and BAs: Agile ceremonies, root-cause analysis, mentoring new joiners and leading testing for releases.

Manual QA Trainee, BlueDwarf Pvt. Ltd., Ahmedabad

Jan 2023 – Jun 2023

- Learned the product and manual testing practice; wrote and executed test cases and logged defects.

PROJECTS

E-commerce Data Quality Project (In progress)

Python • Pandas • SQL • Excel

- E-commerce data is often wrong in small ways that add up: duplicates, missing values and totals that do not match. In progress. Code is being published on GitHub as each stage is completed.

Sales Dashboard in Excel (Completed)

Excel

- Management needed one clear view of e-commerce sales across product categories. An interactive dashboard that stakeholders can filter by category without analyst help.

Employee Performance Mapping (Completed)

SQL

- HR needed reports on employees, performance and project assignments for an appraisal cycle. Reusable queries that answer HR reporting questions directly from the database.

EDUCATION & CERTIFICATION

MCA, Chimanbhai Patel Institute (GTU) — CGPA 7.81

2021 – Jun 2023

BSc IT, CHARUSAT University — CGPA 7.38

Graduated Jun 2020

IIT Delhi Certification Program – Data Analysis (via Simplilearn) — Completed
